Disposable cuffs are sterilized with ETO gas. Re-processing or re-sterilization is not recommended or advised and will void all applicable warranties.

## Key Features

- 1. Fit the Patient and the Procedure** — The disposable tourniquet cuffs are available in various sizes and are color-coded to reduce set-up time while increasing accuracy.
- 2. Reduce the Risk** — Sterile and ready for use, all disposable cuffs include a sized, sterile stockinette sleeve to reduce the risk of cross-contamination and infection.
- 3. Positive Locking Connectors** — All disposable tourniquet cuffs come standard with Positive Locking Connectors and are compatible with all tourniquet systems on the market today.
